# Technical Data

## TOTAL CUSTOMER SUPPORT

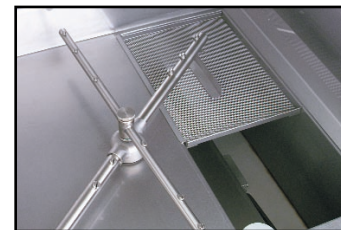

When you install a Washtech dishwashing system you automatically enjoy the most professional service support. Our customer service technicians are always just a phone call away around the clock and all our equipment comes with unbeatable warranty cover.

- 5 years Warranty on wash bay (parts only)
- 2 years Warranty on wash pump (parts & labour)
- 1 year parts and labour Warranty from date of installation on defective materials

Remember that with our rental option you can have an advanced Washtech U Series unit from as little as \$3.80 a day.

**1. DOUBLE FILTRATION**  
The L shaped wash tank provides double filtration to ensure effective separation, collection and removal of food scraps to help keep wash water clean.

**2. STAINLESS STEEL ARMS**  
New stainless steel wash and rinse arms feature powerful KnifeJet sprays for greater spread and higher performance. Removable arms and end caps make cleaning easy.

**3. INSULATED DOOR**  
For energy savings and a cooler and quieter work environment. The magnetic door switch ensures the machine will not operate unless the door is properly closed.

**4. AUTODRAIN FACILITY GLV & UD**  
Washtech machines are now 'unplugged'. With Autodrain there is no drain upstand to be manually removed, risking your hands in hot water.

**5. UNIQUE ONE TOUCH CYCLE CONTROLS**  
Convenient OneTouch quick-start controls give you instant 1, 2, or 3 minute cycles at the touch of a button. You'll never be stuck on the shortest cycle when you can easily select the appropriate wash cycle for every load, ensuring that heavily soiled items are thoroughly cleaned for no greater cost.

Dishwashing Systems  
Undercounter  
U Series

# U SERIES

# THE NEW INDUSTRY STANDARD IN DISHWASHERS

WASHTECH OFFERS

MORE UNDERCOUNTER OPTIONS TO MEET YOUR SPACE AND WASH REQUIREMENTS

More models, more features and more innovation. Washtech dishwashers are the superior solution.

The new U Series of undercounter dishwashers from Washtech combines proven performance with technical innovation from Australasia's largest manufacturer of commercial dish and glasswashers.

Washtech dishwashers are compact, fast, economical and highly effective in meeting the strictest regulatory hygiene requirements. Nobody else offers you so many precision engineered dishwashing options carefully tailored to your needs.

All Washtech dishwashers are manufactured to ISO9001 standards and are backed by comprehensive after sales support.

Washtech supplies the largest range of undercounter dishwashers, along with passthrough and rack conveyor dishwashers, glasswashers and warewashers.

## GLV High Performance Compact Dishwasher

- High performance in a compact unit that takes up less valuable underbench space.
- Fast operation....up to 55 racks per hour of crockery, cutlery, glassware. 435mm racks use space efficiently.
- Powerful pump recirculates wash water at 220 litres per minute.
- New AutoDrain facility - no drain upstand means NO HANDS IN HOT WATER ... an important OH&S benefit. Drain pump now fitted as standard.
- Easier cleaning - double filtration ensures separation of food scraps.
  - Increased door height easily accepts large designer crockery.

## UD High Performance 500mm Rack Dishwasher

The UD offers a wider wash chamber for undercounter use without the need for extensive benching. It also has the largest door in our range with convenient 350mm clearance for contemporary crockery.

Fast operation gives 55 racks per hour using full 500mm racks. The new AutoDrain feature eliminates the drain upstand and avoids hands in hot water, while double filtration ensures the separation of food scraps for easier cleaning. OneTouch quick-start controls give you 1, 2, or 3 minute cycles at the touch of a button. The UD cannot inadvertently be left on the shortest cycle. Instead, you can instantly select a longer cycle for a better wash performance at no more cost!

### TALLER CLEARANCE

350mm tall doors on the UD model easily take large designer crockery.

### RACK OPTIONS

500mm and 435mm racks both allow efficient use of internal space for items of varying size and shape.

## GL Light Duty Dishwasher & Glasswasher

The Washtech GL model is a versatile general purpose machine ideal for dishes and glasses. Convenient OneTouch quick-start controls give you 1, 2, or 3 minute cycles at the touch of a button, so you instantly select the appropriate wash cycle for every load and you can throughput up to 55 racks per hour.

Double filtration ensures hygiene and easier cleaning. The GL is ideal for operations where sandwiches, light snacks and pastries are the order of the day.

## UE Economy 500mm Dishwasher

The UE will accept the full range of 500mm racks for dishes, glassware and cutlery to wash items up to 30cm in height. This convenient 15A plug-in model meets hygiene regulations while using only 3 litres per cycle to minimise water, chemical and energy costs. With a fixed 2 minute cycle this machine will throughput 28 racks per hour. Rugged stainless steel wash/rinse arms and precision engineering ensure reliable operation.

FastClean features include double filtration to make internal cleaning so much easier and quicker. Waste collects where it is easier to reach and to remove.

New AutoDrain feature now available in the UD and GLV eliminates the need to remember to remove and replace the drain upstand. This intuitive feature means that the machine drains with the touch of a button.

Easy OneTouch controls give you the choice of 1, 2, or 3 minute wash cycles at the touch of a button. You can instantly match the cycle to the soil level for optimum performance.

Stylish new flush front insulated door is strong and durable. Because it is more compact it does not protrude into the work area and it is also easier to clean.

New stainless steel arms incorporate our unique high performance KnifeJet wash system to cut through soil with greater impact pressure over a 77° spray pattern.
